

I support Satelite Radio and believe that they should not be prevented from carrying any programs they wish including weather, and traffic reports. I find the advertising free channels to be pleasant as I drive in my automobile. I believe that each citizen should have the right to listen to whatever programing they choose. I realize that normal broadcasters are threatened by satelite service as the programing extends beyond their signal reach, but we promote competition and the freedoms of choice should continue. I also believe that Satelite radio people should have to abide by the same FCC rules as other broadcasters. There should be a level playing field. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Thank you for considering my comments.
